PROFILE

Results driven Full Stack Web Developer with over 4.5 years of hands on experience in developing scalable and high-performance web applications. Specialized in Front-End Development using modern JavaScript frameworks such as React.js and Vue.js, with expertise in crafting intuitive, responsive, and maintainable user interfaces. Adept at writing clean, efficient code and optimizing performance to enhance user experience. Passionate about delivering seamless digital solutions through a balance of technical precision and creative design.

PROFESSIONAL EXPERIENCE

Product Engineer (Contract) – Full-Stack EdTech Platform   04/2025 – 12/2025 | Remote
Dronacharya Career Academy

- Developed a production-grade EdTech platform deployed on AWS (Lambda, S3, CloudFront) and Vercel, delivering mock tests, advanced performance analytics, current affairs content, and secure Razorpay payment integration, ensuring high performance, scalability, and reliability in a real-world production environment.
- Built the platform using React.js and MUI on the frontend, with a serverless backend powered by Node.js, Express.js, and AWS Lambda (HTTP APIs), while leveraging MongoDB for scalable data persistence and AWS S3 for static asset storage.
- Led **end-to-end ownership** of the **full-stack EdTech platform**, covering architecture, development, deployment, and ongoing enhancements, and worked directly with academy leadership to translate requirements into a production-ready, scalable product.

Impact:
- Enabled students to make data-backed academic decisions through structured analysis rather than raw scores.
- Delivered a production-ready EdTech solution used by real learners with live payments, real exam content, and continuous feature enhancements.

Senior Software Engineer   03/2024 – 12/2024 | Remote
Food Market Hub (FMH Singapore)

- Led front-end development initiatives, mentoring junior developers and conducting code reviews to enforce best practices, while architecting complex state management workflows using Redux Toolkit (RTK) and Vue.js Composition API to improve component reusability and data flow efficiency.
- Enhanced platform stability and performance by resolving critical production issues under tight deadlines and implementing advanced optimizations such as lazy loading, memoization, and bundle size reduction, while collaborating with stakeholders to translate business requirements into robust technical solutions that improved user engagement and customer satisfaction.

Software Engineer   07/2021 – 03/2024 | Remote
Food Market Hub (FMH Singapore)

- Designed and delivered key features for a modern Food and Business Management Platform, streamlining supplier–restaurant workflows for inventory optimization and waste reduction, while building and optimizing data-driven user interfaces using React.js, Redux, and Vue.js (Composition API) in close collaboration with product, design, and backend teams.
- Improved application performance and code quality through systematic debugging, profiling, and refactoring of legacy components, resulting in a 25% increase in application speed and more scalable, maintainable solutions aligned with business goals.

🗂 PROJECTS

Personal Portfolio   04/2025 – 07/2025
Built a responsive portfolio using React, JS, HTML, and Tailwind CSS with optimized components, reusable Ul patterns, and mobile-first design.

Vidya Voult   02/2025 – 05/2025
Built a full-stack educational platform using React.js, Node.js, Express.js, and MongoDB, enabling course uploads and interactive learning. Implemented JWT authentication and responsive Ul with Tailwind CSS for scalability and performance.

Inventory Management   07/2024 – 11/2024
Built a secure full-stack system for item and stock tracking using React, Node.js/Express, and MongoDB, with responsive Ul and optimized CRUD workflows.

Employee Management System (EMS)   01/2024 – 02/2024
Developed a CRUD-based employee record management tool using React with controlled forms, reusable components, and responsive Ul.

🧠 SKILLS

HTML CSS • Typescript • React JS • Next JS • Vue JS • Redux • Node JS • Express js • MongoDB • SQL • Razorpay Payment Gateway • Git / Github • CVCD • AWS-S3bucket, AWS Lambda • Vercel • Netlify

🎓 EDUCATION

Bachelor of Engineering   2017 – 2020 | Mumbai
Bharat College Of Engineering

📜 CERTIFICATES

Meta Full Stack Developer
Trained in full-stack web development including HTML, CSS, JavaScript, React, Node.js. Express, MongoDB, Git, and Python basics. Completed a copstone full-stack project integrating API development with front end UI.

📚 COURSES

Modern React Bootcamp (Front-End Web Development) & Web Development Bootcamp (Full Stack Web Development)   08/2024 – 01/2025

Modern React Bootcamp (Front-End Web Development) & Web Development Bootcamp (Full Stack Web Development)

Acquired expertise in React.js, Redux, Redux Toolkit (RTK), and Tailwind CSS, as well as in REST API integration and database management using SQL and MongoDB for end-to-end application development.

Advanced JavaScript and MERN Stack Development   08/2022 – 03/2023 | Mumbai

Pesto Tech

Gained in-depth knowledge of advanced JavaScript concepts and developed full- featured MERN stack web applications, ensuring scalability and performance across different use cases.
